

ASAP NORWAY is a norwegian company, who together with the healthcare professionals, has developed protective covers for the next generation; for beds, tables, and stretchers, where liquid waste and spills are a problem.

ASAP GEMINI™ is a new product developed to be the world's best coffin protection - A superabsorbent biodegradable sheet custom made to absorb body fluids. It is the ultimate liquid protection and can be nicely wrapped around the body. The product combines very high absorbency with high lifting strength, without compromising the environment. Equipped with a white-coloured barrier layer of bio-film, the product is both waterproof and breathable.

ASAP JONA 200™ is a universal, multi-purpose sheet designed for stretchers and beds and is also used as a transporting sheet or for wrapping. Self-adhesive tape ensures stability. Makes it possible to fold collecting pouches along the sides or seal the sheet around the user. Suitable for transport and transferal.

The products are made of a material with very high absorbency capacity, 10 litres per square metre. The products are 0.7mm thick, equipped with a coloured barrier layer that prevents leaks. High durability and able to withstand a load of 150 kg.
